

Applicant most respectfully submits that when the Sequence Listing was prepared for the PCT Application the PatentIn Release #1.0, Version No. 1.30 for the EPO was used and this must have contained a bug. Applicant was not earlier aware of the mistakes in the Sequence Listing and have now corrected these errors.

More particularly, Applicant submits herewith a new Sequence Listing using the PatentIn Version 2.1 and imported the sequences 1-4 from the specification and claims where the sequence appear in the correct form. The content of the paper and computer readable copies are the same and no new matter has been added to the disk as the disk contains the Sequence Listing based upon the original disclosure and does not contain any new matter.

In view of the above comments and further amendments to the specification, an early action on the merits is now believed to be in order and is most respectfully requested.

Respectfully submitted,
BACON & THOMAS, PLLC
